

SEWP OVERVIEW

The National Aeronautics and Space Administration (NASA) Solutions for Enterprise-Wide Procurement (SEWP) VI contract, pronounced "soup," provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services to all Federal agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. SEWP started as a products-only vehicle and has grown over the past 30 years to meet the evolving needs of its customers. The program is self-funded through a usage fee of 0.34 percent and provides acquisition support to all Federal agencies, processing more than 50,000 orders each year.

FAIR OPPORTUNITY

Under Federal Acquisition Regulation (FAR) 16.505(b)(1), each contract holder must be given a fair opportunity to be considered for each order exceeding \$10,000 that is issued under a multiple-award contract. The method used to provide fair opportunity is at the discretion of the Contracting Officer (CO), and the CO must document the rationale for the placement and price of each order. The SEWP online Quote Request Tool (QRT) is the recommended method to support this process and the required decision documentation. The QRT automatically includes the contract holders within a selected group or a suggested source.

ABOUT INFOTREND

Infotrend, Inc. is a small business headquartered in College Park, Maryland, that has built and sustained enterprise applications and data platforms for Federal Chief Information Officer (CIO) organizations for 17 years. Our capabilities span advanced data analysis, reporting, and business intelligence; data integration, Application Programming Interface (API) management, and automation; cloud migration and Development, Security, and Operations (DevSecOps); enterprise architecture and IT portfolio governance; and governed, use-case-driven artificial intelligence (AI). Infotrend is appraised at Capability Maturity Model Integration (CMMI) Maturity Level 3 and certified to International Organization for Standardization (ISO) 9001, 20000-1, and 27001.

WHAT'S IN SCOPE FOR SEWP VI?

The National Aeronautics and Space Administration (NASA) Solutions for Enterprise-Wide Procurement (SEWP) VI contract provides a broad suite of IT, Communication, and Audio-Visual (ITC/AV) solutions and services. Technology is always evolving, so SEWP's processes let contract holders add new commercial technology and IT services to their contracts as customers request them. SEWP VI contracts were awarded by scope category, and Infotrend is a Category C contract holder.

CATEGORY C: MISSION-BASED ITC/AV SERVICE SOLUTIONS

Category C delivers customized solutions at the mission or program level. In-scope services include custom computer programming, IT and AV engineering and design, data processing and analysis, hosting, IT operations, network operations, cybersecurity, digital government services, and IT consulting. Category C supports a specific mission or program. Agency-wide, multi-department requirements fall under Category B.

If you would like SEWP to confirm whether your requirement is within scope, please send an overview to help@sewp.nasa.gov for review.

INFOTREND'S CATEGORY C SERVICES

- ✓ **Data Analytics and Business Intelligence:** advanced data analysis, reporting, dashboards, and data validation
- ✓ **Custom Application Development:** building and sustaining enterprise applications and data platforms
- ✓ **Data Integration and Automation:** Application Programming Interface (API) management, data pipelines, and process automation
- ✓ **Cloud Hosting and Modernization:** cloud migration and Development, Security, and Operations (DevSecOps) delivery
- ✓ **Cybersecurity Services:** secure operations under Authority to Operate (ATO) and National Institute of Standards and Technology (NIST) 800-53 controls
- ✓ **IT Consulting and Digital Government:** enterprise architecture, IT portfolio governance, and governed artificial intelligence (AI)

ORDERING PROCESS

Each agency's internal ordering process varies. The issuing agency, not the NASA SEWP Program Management Office (PMO), defines the process and forms for Purchase Requests (PRs) and Delivery Orders (DOs) issued against a SEWP contract. Typically, an end user identifies a requirement and generates a PR. The PR and any necessary funding information go to the agency's procurement office, which issues the DO. Any valid Federal agency DO form and associated DO number may be used. The SEWP PMO does not issue DOs. It reviews, processes, and tracks issued DOs and forwards them to the contract holder.

Some agencies have special requirements for issuing IT DOs, and the issuing agency's Contracting Officers (COs) are responsible for knowing those policies. SEWP does not require agencies to use intermediary procurement offices unless their own internal policies direct it. Modifications to any order must also route through the SEWP PMO.

HOW TO REQUEST A QUOTE FROM INFOTREND

Agencies can request a quote through the SEWP Quote Request Tool (QRT) by selecting Category C or listing Infotrend as a suggested source, or by emailing our SEWP VI Program Manager using the contact information below. Please include your SOW, PWS, or SOO; your period and place of performance; any clearance requirements; and your quote due date. For assistance, contact Frank Dominick, Program Manager, at fdominick@infotrend.com or (571) 208-9078.
